Buffalo Filter Launches PlumePen® Pro Surgical Plume Evacuation Pencil
Newest Addition to PlumePen Product Portfolio

Lancaster, NY (February 12, 2015) – Buffalo Filter is pleased to announce PlumePen® Pro our newest offering in surgical plume evacuation pencils. Featuring a 360 degree swivel, transparent capture port, and compact design, PlumePen Pro is a significant addition to our product portfolio offering a high quality, cost effective solution combining precision surgical smoke management and electrocautery without compromising quality and features.

“PlumePen Pro is a unique all-in-one, high quality electrocautery pencil. It provides surgeons a cost effective option for surgeries that do not require an adjustable capture port and full blade reveal. It is also an excellent replacement option for surgical smoke pencil attachments,” states Joseph Lynch, Vice President of Sales and Marketing.

Features and Benefits:

Sleek, Textured Profile

Similar in size to standard electrocautery pencils with raised texturing to improve surgeon's grip

360 Degree Swivel

Rotating connection allows for fluid hand movement and free range of motion

Transparent Capture Port

Provides a clear view of the blade

Wire Management

Seamless integration of ESU wire and tubing provides organized cord management

Light, Flexible Tubing

Aids in hand fatigue and tension on the wrist

Simple Connectivity

Easily connects to most surgical plume evacuators and ESU generators

For more information on PlumePen Pro, please contact Buffalo Filter at 716.835.7000 or at smoke-info@buffalofilter.com.

About Buffalo Filter

Buffalo Filter is a world leading medical device manufacturer and supplier of surgical smoke plume evacuation equipment. Our products are used to evacuate and filter hazardous smoke plume and/or aerosols created during over 95% of all surgical procedures. Proven to contain toxic gases, live cellular material (including blood fragments) and viruses, this plume may also cause respiratory and eye irritation or nausea in healthcare professionals and may create visual problems for the surgeon.
